Important Notices

This Presentation has been prepared by Dacian Gold Limited (**Dacian**) and NTM Gold Limited (**NTM**) and is authorised by the Board of Directors of Dacian and the Board of Directors of NTM.

DISCLAIMER

This Presentation has been prepared by Dacian and NTM based on information from its own and third party sources and is not a disclosure document. No party other than Dacian and NTM has authorised or caused the issue, lodgement, submission, despatch or provision of this Presentation, or takes any responsibility for, or makes or purports to make any statements, representations or undertakings in this Presentation. Except for any liability that cannot be excluded by law, Dacian and NTM and their respective related bodies corporate, directors, employees, servants, advisers and agents disclaim and accept no responsibility or liability for any expenses, losses, damages or costs incurred by you relating in any way to this Presentation including, without limitation, the information contained in or provided in connection with it, any errors or omissions from it however caused, lack of accuracy, completeness, currency or reliability or you or any other person placing any reliance on this Presentation, its accuracy, completeness, currency or reliability.

This Presentation is not a prospectus, disclosure document or other offering document under Australian law or under any other law. It is provided for information purposes and is not an invitation nor offer of shares or recommendation for subscription, purchase or sale in any jurisdiction. This Presentation does not purport to contain all the information that a prospective investor may require in connection with any potential investment in Dacian or NTM. Each recipient must make its own independent assessment of Dacian and NTM before acquiring any shares in Dacian or NTM.

NOT INVESTMENT ADVICE

Each recipient of the Presentation should make its own enquiries and investigations regarding all information in this Presentation including but not limited to the assumptions, uncertainties and contingencies which may affect future operations of Dacian and NTM (individually and as a merged group) and the impact that different future outcomes might have. Information in this Presentation is not intended to be relied upon as advice to investors or potential investors and has been prepared without taking account of any person's individual investment objectives, financial situation or particular needs. Before making an investment decision, prospective investors should consider the appropriateness of the information having regard to their own investment objectives, financial situation and needs and seek legal, accounting and taxation advice appropriate to their jurisdiction. Neither Dacian nor NTM are licensed to provide financial product advice in respect of their securities.

FORWARD LOOKING INFORMATION

This Presentation contains forward-looking statements. Wherever possible, words such as "intends", "expects", "scheduled", "estimates", "anticipates", "believes", and similar expressions or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved, have been used to identify these forward-looking statements. Although the forward-looking statements contained in this Presentation reflect management's current beliefs based upon information currently available to management and based upon what management believes to be reasonable assumptions, Dacian and NTM cannot be certain that actual results will be consistent with these forward-looking statements. A number of factors could cause events and achievements to differ materially from the results expressed or implied in the forward-looking statements. These factors should be considered carefully and prospective investors should not place undue reliance on the forward-looking statements. Forward-looking statements necessarily involve significant known and unknown risks, assumptions and uncertainties that may cause actual results, events, prospects and opportunities to differ materially from those expressed or implied by such forward-looking statements. Although Dacian and NTM have attempted to identify important risks and factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors and risks that cause actions, events or results not to be anticipated, estimated or intended, including those risk factors discussed in the Company's public filings. There can be no assurance that the forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, prospective investors should not place undue reliance on forward-looking statements. Any forward-looking statements are made as of the date of this Presentation, and Dacian and NTM assume no obligation to update or revise them to reflect new events or circumstances, unless otherwise required by law.

COMPLIANCE STATEMENTS

Dacian

Mineral Resource and Ore Reserve: This Presentation contains references to Dacian's Mineral Resource and Ore Reserve estimates, which have been extracted from the ASX announcement titled "2019 Mineral Resource and Ore Reserve Update" dated 27 February 2020 (**February Announcement**).

Production targets and forecast financial information: This Presentation contains production targets and forecast financial information derived from production targets which were first disclosed in the February Announcement.

Exploration Results: This Presentation contains references to Dacian's exploration results, which has been extracted from the following ASX announcements titled 'Mt Morgans Gold Operation Exploration Update' dated 24 July 2020 and 'High Grade Drilling Results Along Strike At Mt Marven' dated 23 October 2020

Dacian confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements. In the case of the Mineral Resource and Ore Reserve estimates, all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. In the case of the production targets and forecast financial information, all the material assumptions underpinning the production target and forecast financial information in the February Announcement continue to apply and have not materially changed.

NTM

Mineral Resource: This Presentation contains references to NTM's Mineral Resource estimates, which have been extracted from the ASX announcements titled "Maiden Hub Resource of 141Koz" dated 1 September 2020 and 'Redcliffe Resource Increases by 94% to 538koz' dated 12 June 2018

Exploration Results: This Presentation contains references to NTM's exploration results, which has been extracted from the following the ASX announcements titled 'Exceptional Grades from Nambi' dated 7 May 2018, 'GTS Continues at Depth' dated 25 May 2018, 'Hub Deposit Extends with More High Grades at Depth' dated 28 October 2020 and 'Hub Extension Program Intersects Further High Grades' dated 21 September 2020

NTM confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements and, in the case of the Mineral Resource estimate, that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

Unless otherwise stated, all dollar values in this Presentation are reported in Australian dollars.

Transaction Rationale

Strategic combination that has the opportunity to extend mine life at Mt Morgans, leveraging Dacian's operational expertise and processing infrastructure to unlock the potential of the Redcliffe Gold Project through regional consolidation

"On Strategy" transaction that delivers high-value Mineral Resources within haulage distance to extend mine life

- Aligned with Dacian's corporate strategy centred on a simplified operating plan that prioritises open pit production and growth through organic exploration, development and regional consolidation
- Strategic consolidation of shallow, high-grade Mineral Resources at NTM's Redcliffe Project including 890kt @ 4.9g/t Au for 141koz that sit within a global Mineral Resource of 13.4Mt @ 1.57g/t for 679koz¹
- The Redcliffe Gold Project lies within a 100km radius of Dacian's Mt Morgans Gold Operations

Operational diversity and flexibility with additional optimisation opportunities

- Opportunity to diversify production at Mt Morgans via a second mining centre creating operating flexibility and reducing risk
- Opportunities to enhance and extend Dacian's existing mine plan given the presence of high-grade, shallow oxide mineralisation such as at the Hub and GTS deposits
- Potential for significant mine life extensions at Mt Morgans and to realise the full potential of the combined Merged Group's Mineral Resource base of 45.4Mt @ 1.88g/t for 2.75Moz¹
- Significant potential to optimise the Redcliffe Gold Project's grade profile, highlighted by the 50%+ increase in Mineral Resource average grade from 1.57g/t to 2.40g/t by lifting the cut-off grade by 0.5g/t to 1.0g/t (except for the Hub deposit)²

Leverages Dacian's processing infrastructure, operations in the region and strengthened financial position

- Realises significant capital expenditure synergies for NTM Shareholders by leveraging Dacian's recently constructed 2.5Mtpa processing facilities (with steady-state throughput of 2.9Mtpa)
- Allows for rapid integration of NTM's Redcliffe Gold Project into Dacian's Mt Morgans Gold Operations

Significant combined pipeline of exploration and development opportunities

- The Merged Group will have a highly prospective land position of over 1,300km² in the Leonora-Laverton District with a significant organic growth pipeline of advanced exploration targets and Mineral Resource growth opportunities
- Strong cash flows supporting discovery and delineation of potential future production sources
- NTM's exploration personnel will transition to the Merged Group, maintaining a continued and comprehensive knowledge base on the Redcliffe Gold Project

1. Refer Slide 13 and Slide 2 for details on Merged Group Mineral Resources.

2. Based on 1.0g/t Au cut-off grade used for all deposits except for Hub is based on a 0.5g/t Au cut-off grade. Refer Slide 13 and Slide 2.

Transaction Details

Unanimous support from NTM Gold's Board and major shareholders for the merger

Transaction Structure	<ul style="list-style-type: none">• Merger between Dacian Gold and NTM Gold to be implemented via a NTM Gold Scheme of Arrangement, under which Dacian Gold will acquire 100% of the shares in NTM Gold• Following implementation of the Scheme, the Merged Entity will continue to trade as Dacian Gold Limited under the ticker DCN:ASX• Contemporaneously, outstanding NTM Options to be cancelled via private treaty arrangement, subject to ASX granting a waiver of Listing Rule 6.23.2• Scheme Implementation Deed entered into between parties
Transaction Consideration	<ul style="list-style-type: none">• Each NTM Gold shareholder will receive 1 Dacian Gold share for each 2.7 NTM Gold shares held• Upon Scheme Implementation, Dacian Gold shareholders will hold approximately 68.4% of the ordinary shares and NTM Gold shareholders will hold approximately 31.6% in the Merged Group, respectively¹• CGT scrip-for-scrip rollover relief is expected for Australian NTM shareholders²• NTM Gold Options to be exchanged for new Dacian Gold Options at the 2.7 exchange ratio and on the same equivalent terms³
Board Recommendation and Shareholder Support	<ul style="list-style-type: none">• Unanimously recommended by the Boards of both NTM Gold and Dacian Gold, and in NTM Gold's case, in the absence of a superior proposal and subject to an Independent Expert concluding the Merger is in the best interest of NTM Gold shareholders• NTM Gold shareholders, including Board members, representing a combined voting interest of 32.9% are supportive of the Merger, in the absence of a superior proposal• Positive voting intention statements received from the two largest NTM Gold shareholders: Empire Resources Group (13.7%) and DGO Gold Limited (13.6%)
Leadership and Integration	<ul style="list-style-type: none">• Continued leadership from Leigh Junk as Managing Director and Ian Cochrane as Chairman of Dacian• NTM Gold Director Eduard Eshuys will join the Dacian Board as a non-executive Director• NTM Gold's exploration employees to continue in their existing roles and be integrated into the Merged Group
Indicative Implementation Timetable	<ul style="list-style-type: none">• Scheme Implementation Deed executed: 16 November 2020• First Court hearing: 13 January 2021• Scheme Booklet dispatched to NTM Gold Shareholders: 18 January 2021• Scheme Meeting: 18 February 2021• Second Court Hearing (Approval): 22 February 2021• Effective Date: 23 February 2021• Record Date: 25 February 2021• Implementation of Scheme: 3 March 2021

1. Based on pro forma Dacian ordinary shares including NTM Gold shares (inclusive of 9.25M performance rights) being converted to Dacian ordinary shares at a 2.7 Exchange Ratio.

2. Shareholders should seek tax advice in relation to these matters and refer to the Scheme Booklet for further details.

3. Existing 60M NTM Gold options (\$0.10/s exercise price, expiring on 31 March 2022) to be exchanged for new Dacian Gold Options at the 2.7 ratio, resulting in 22.2M Dacian Gold Options being issued at a \$0.27/s exercise price, expiring on 31 March 2022.

The only holder of options in NTM is DGO Gold Limited. Eduard Eshuys is a Non-Executive Director of NTM Gold and Executive Chairman of DGO Gold Limited and is considered to hold a relevant interest in the security holdings of DGO Gold Limited in NTM.

Key benefits for NTM Gold shareholders

Transformative opportunity for NTM Gold shareholders to immediately transition from explorer to gold producer whilst maintaining exposure to the Redcliffe Gold Project

Immediate value realisation event at an attractive premium

- Exchange Ratio of 1 Dacian share per 2.7 NTM shares
- Implied Offer Price of \$0.141 per share based on Dacian's 30-day VWAP prior to the announcement date¹
- Implied Offer Price premium of 26.1% based on the 30-day VWAP of both companies prior to the announcement date
- An immediate and significant increase in the potential value of NTM's resources, particularly the near surface high grade mineralisation, via the ability to access to Dacian's processing facilities

Significant shareholding in an established gold producer with ongoing exposure to the Redcliffe Gold Project

- NTM Shareholders will hold a significant pro forma ordinary shareholding of 31.6% in the Merged Group
- The Scheme provides an immediate transition from explorer to gold producer whilst retaining meaningful exposure to ongoing exploration success at the Redcliffe Gold Project
- Enables the Merged Group to accelerate and de-risk the development strategy of the Redcliffe Gold Project by utilising Dacian's established infrastructure and operational expertise

Exposure to potential improved market rating and enhanced liquidity of the Merged Group

- As a shareholder in the Merged Group, NTM Gold shareholders can be expected to benefit from deeper trading liquidity and broader research coverage
- Merged Group to benefit from enhanced scale and market positioning and potential future inclusion in relevant gold and ASX indices

1. VWAP is the volume weighted average price and is sourced from IRESS and based on the period immediately prior to announcement date of 16 November 2020.

Pro Forma Merged Group overview

Pro Forma Merged Group market capitalisation of \$285M and cash balance of \$44M as at 30 September 2020

	Unit	Dacian Gold	NTM Gold	Pro Forma Merged Group

1. Market data as at 13 November 2020. Exchange Ratio of 1 DCN share per 2.7 NTM shares applied to Dacian last close of \$0.350/s as at 13 November 2020 to derive NTM Gold's Implied Share Price. NTM Gold Shares include 9.25M Performance Rights (exercised as part of the Scheme). Refer to Slide 15 for Dacian's existing capital structure, and Slide 29 for NTM Gold's existing capital structure.

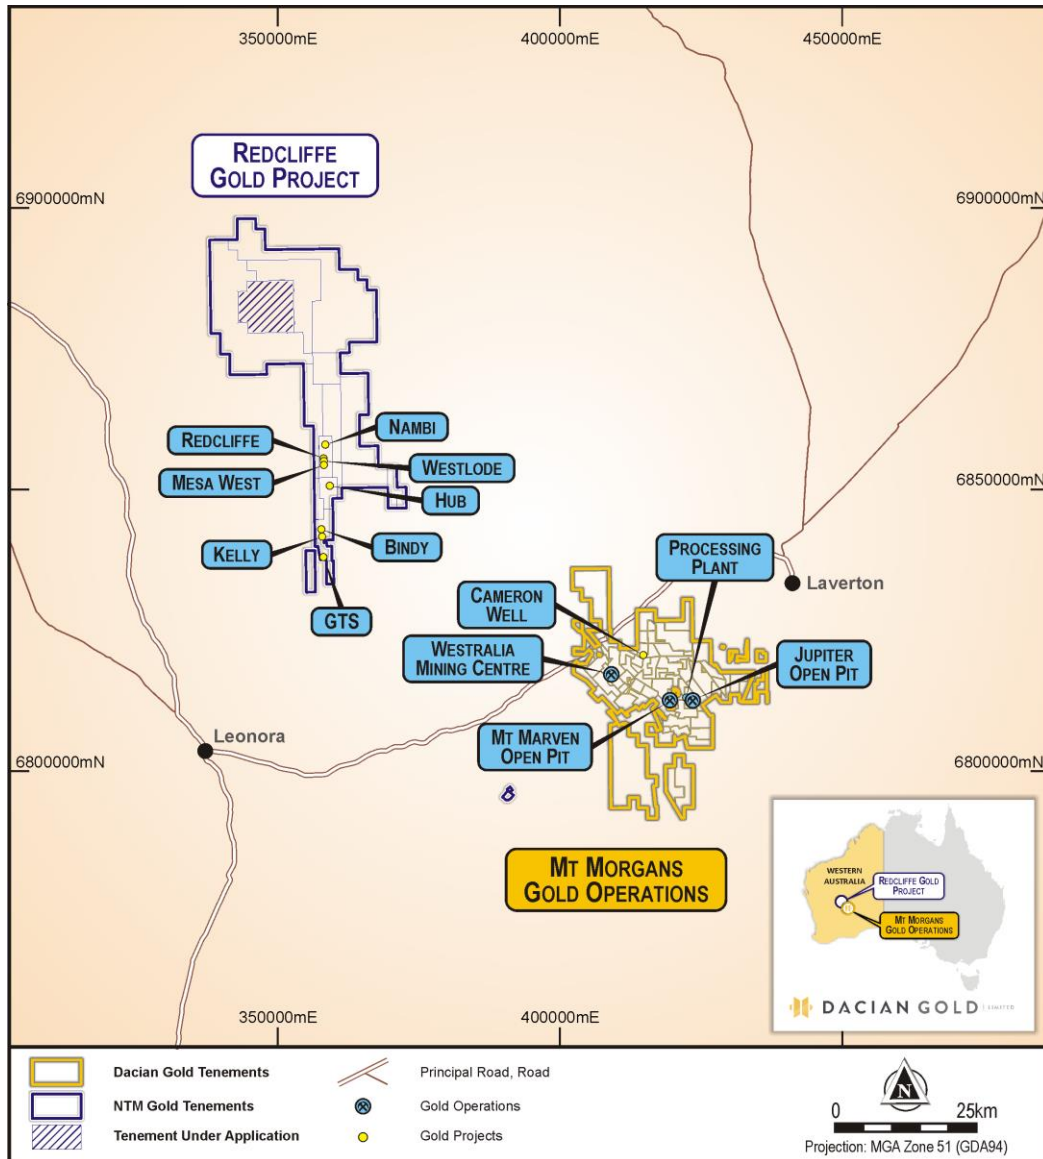

2. Refer to Slide 15 for details on Dacian's 0.85M existing options. Existing 60M NTM Gold options (\$0.10/s exercise price, expiring on 31 March 2022) to be exchanged for new Dacian Gold Options at the 2.7 ratio, resulting in 22.2M Dacian Gold Options being issued at a \$0.27/s exercise price, expiring on 31 March 2022.

3. Cash and equivalents includes bullion.

4. Debt excludes IFRS 16 Leases.

5. Refer Slide 13 and Slide 2 for full details of Dacian and NTM Gold Mineral Resources and Ore Reserves.

Strategic regional consolidation

- Both companies' assets are located in the highly prospective Leonora-Laverton District in Western Australia, surrounded by several multi-million ounce deposits
- NTM's Redcliffe Gold Project lies within a 100km radius from Dacian's Mt Morgans Gold Operations
- Multiple haulage routes identified allowing for rapid integration into Dacian's processing plant
- Opportunity for low capital development of high-grade, shallow oxide mineralisation such as at the Hub and GTS deposits
- Further opportunity for regional consolidation

Mineral Resource to Ore Reserve conversion strategy

Significant opportunities to extend mine life through integration and optimisation of Redcliffe Gold Project

- Merger will increase Dacian's Mineral Resource ounces by 33% and average grade by 33% (excluding MMGO Underground)
- Significant potential to optimise the Redcliffe Gold Project's grade profile, highlighted by the 50%+ increase in Mineral Resource grade from 1.57g/t to 2.40g/t by lifting the cut-off grade by 0.5g/t to 1.0g/t at all deposits (excluding Hub which is based on 0.5g/t)¹
- Opportunity to rapidly drive Mineral Resource to Ore Reserve conversion and ultimately towards mine life extensions

NTM Gold Mineral Resources (koz and g/t)^{1,2}

Merged Group Mineral Resources (koz)²

Dacian's Current 3-Year Production Outlook (koz)³

1. NTM Gold Mineral Resources based on 1.0g/t Au cut-off grade used for all deposits except for Hub which is based on a 0.5g/t Au cut-off grade.

2. Refer Slide 13 and Slide 2 for further details on Mineral Resources and Ore Reserves.

3. Refer to ASX announcement 13 July 2020 and ASX announcement titled "2019 Mineral Resource and Ore Reserve Update" dated 27 February 2020 for details on the production outlook.

NTM's Redcliffe Gold Project presents an attractive Mineral Resource base

Shallow, high-grade Hub, GTS and Nambi deposits are key development targets and include oxide material to potentially increase mill throughput rates

	Mineral Resources ¹	Description	Strategy
Hub	141koz @ 4.92 g/t (0.5g/t cut-off grade)	<ul style="list-style-type: none"> High grade oxide close to surface Open at depth and along strike Within 100km radius from the Mt Morgans Operations Includes oxide of 43koz @ 6.6 g/t Au to 80m depth¹ 	<ul style="list-style-type: none"> Resource definition drilling to upgrade resource classification Advance mining optimisation studies Progress mining lease application
GTS	117koz @ 1.90 g/t (1.0g/t cut-off grade)	<ul style="list-style-type: none"> High grade oxide close to surface Open at depth and along strike Within 100km radius from the Mt Morgans Operations Includes oxide of 29koz @ 2.6 g/t Au¹ Existing mining lease 	<ul style="list-style-type: none"> Strike extensional drilling Advance mining optimisation studies
Nambi	132koz @ 3.11 g/t (1.0g/t cut-off grade)	<ul style="list-style-type: none"> Open at depth Within 100km radius from the Mt Morgans Operations Existing mining lease 	<ul style="list-style-type: none"> Resource definition drilling to upgrade resource classification Advance mining optimisation studies
Other NTM Mineral Resources	136koz @ 1.6 g/t (aggregate ounces and average grade at 1.0g/t cut-off grade)	<ul style="list-style-type: none"> Other Redcliffe deposits along the Mertondale Shear Zone, including Bindy, Redcliffe and Kelly Recent acquisition by NTM Gold of Wells Group (+426km²) adds additional upside potential 	<ul style="list-style-type: none"> Priority ranking for integration into development pipeline Resource definition drilling

1. NTM Gold Mineral Resources based on 1.0g/t Au cut-off grade used for all deposits except for Hub is based on a 0.5g/t Au cut-off grade. Refer Slide 13 and Slide 2 for further details.

Reinforces Dacian's position as an emerging gold producer

Significant upside potential in Dacian's market rating

Benchmarking of comparable mid cap gold producers and developers by Market Capitalisation (\$M)¹

Benchmarking of comparable mid cap gold producers and developers by Gold Mineral Resource (Moz Au) and EV/Mineral Resource (\$/oz)^{1,2}

1. Market data sourced from ASX announcements and S&P Global CapIQ as at 13 November 2020. Merged Group market capitalisation based on pro forma Dacian ordinary shares including NTM shares (inclusive of 9.25M performance rights) being converted to Dacian ordinary shares at a 2.7 Exchange Ratio.
2. Total Gold JORC Mineral Resources sourced from ASX announcements as at 13 November 2020. Refer Slide 13 and Slide 2 for details on Merged Group Mineral Resources. Refer to Slide 42 for additional details on peers' ASX announcements.

Strategic merger to create shareholder value

Transaction Rationale

- “On Strategy” transaction that delivers high-value Mineral Resources within haulage distance to extend mine life
- Operational diversity and flexibility via second mining center with additional optimisation opportunities
- Leverages Dacian’s processing infrastructure, operations in the region and strengthening financial position
- Significant combined pipeline of exploration and development opportunities

Key Benefits to NTM Shareholders

- Immediate value realisation event at an attractive premium
- Significant shareholding in an established gold producer with ongoing exposure to the Redcliffe Gold Project
- Exposure to potential improved market rating and enhanced liquidity of the Merged Group

Leigh Junk, Managing Director of Dacian, commented: *“This merger will create value by delivering on our strategy of extending mine life, diversifying our production base and increasing operational flexibility at Mt Morgans. This is a logical step for Dacian to expand operations in our region by unlocking resources within haulage distance of our substantial processing infrastructure, enabling future resource and reserve additions to be brought quickly into production.”*

The merger with NTM creates an industry leading portfolio of advanced exploration targets underpinned by potential high-margin, low capital intensity development opportunities, which would significantly expand Dacian’s production profile through the addition of high-grade deposits to our operating plan, further future proofing our business.”

Andrew Muir, Managing Director of NTM Gold, commented: *“This is a compelling transaction for NTM and provides the financial, processing and operating strength to unlock the value of the Redcliffe Gold Project.”*

The transaction is an outstanding opportunity for NTM given the proximity of both companies’ assets and delivers to NTM shareholders immediate exposure to gold production while still enabling them to benefit from future exploration success at both Redcliffe and Mt Morgans.”

Merged Group's Mineral Resources and Ore Reserves

The merger will result in a combined Mineral Resource base of 45.4Mt @ 1.9g/t for 2.7Moz

NTM Gold - Redcliffe Gold Project JORC Resource at 0.5g/t cut off¹

Delivering on Objectives

Resetting of the baseline at Dacian provides the platform to unlock value

-  \$98M recapitalisation of Dacian completed in April 2020
-  September quarter production of 32,799oz at an AISC of \$1,315/oz tracking well against FY2021 guidance
-  Reduced debt by \$55.6M to \$39.1M during CY2020 to date. Net debt position of \$0.6M at 30 September 2020
-  Hedging restructure complete, reducing commitments from ~70% to ~40% of remainder of FY2021 production
-  Experienced senior management team driving Dacian's turnaround
-  Scoping study for the reoptimisation of underground operations underway
-  Exploration strategy bearing fruit with initial Mt Marven extensional drilling delivering results
-  Extending mine life visibility through conversion of current Mineral Resources and delineation of new mineralisation across the land package

Enviably Land Position in Well Endowed WA Gold Belt

Sizeable Mineral Resource base across the tenement holding in a significant gold region

FY2021 – Investing in the Future

Sustainable open pit operations at MMGO

- FY2021 forecast production of 110,000-120,000oz at an AISC of \$1,400-\$1,550/oz*
- September quarter production of 32,799oz at an AISC of \$1,315/oz tracks well against guidance
- Mill feed now solely from open pit sources as Heffernans, Doublejay and Mt Marven contribute production during FY2021
- Development capital of \$55M during FY2021 focused on investment in Doublejay pre-stripping, with capital investment declining and cash flow harvesting thereafter
- Sustainable production rates at an average of 110,000oz pa at an AISC of \$1,425/oz

	FY2021	FY2022	FY2023	Three Year
Production	110-120koz	100-110koz	100-110koz	325koz

Development Capital	\$55M	\$18M	nil	\$73M

**Refer ASX announcement 13 July 2020*

Open Pit Provides Production Close to the Mill

Jupiter open pit underpins production profile

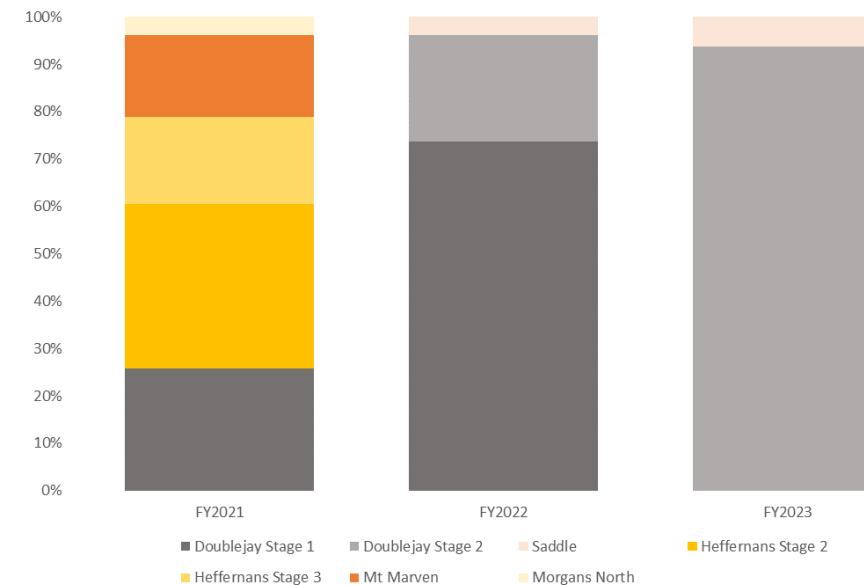

- Continued mining operations at Jupiter provides base load ore feed to the processing plant
- Jupiter consists of the Heffernans, Doublejay and Saddle sub-pits (Ore Reserve of 9.7Mt @ 1.3 g/t for 390,000oz)*
- Mt Marven open pit to provide additional ore source during FY2021
- Total open pit Ore Reserves of 10.2Mt @ 1.3 g/t for 410,000oz
- Total open pit Mineral Resources of 19.7Mt @ 1.3 g/t for 807,000oz

Respective Jupiter sub-pits

**Refer Slide 13 for further details*

Forecast production contribution by sub-pits

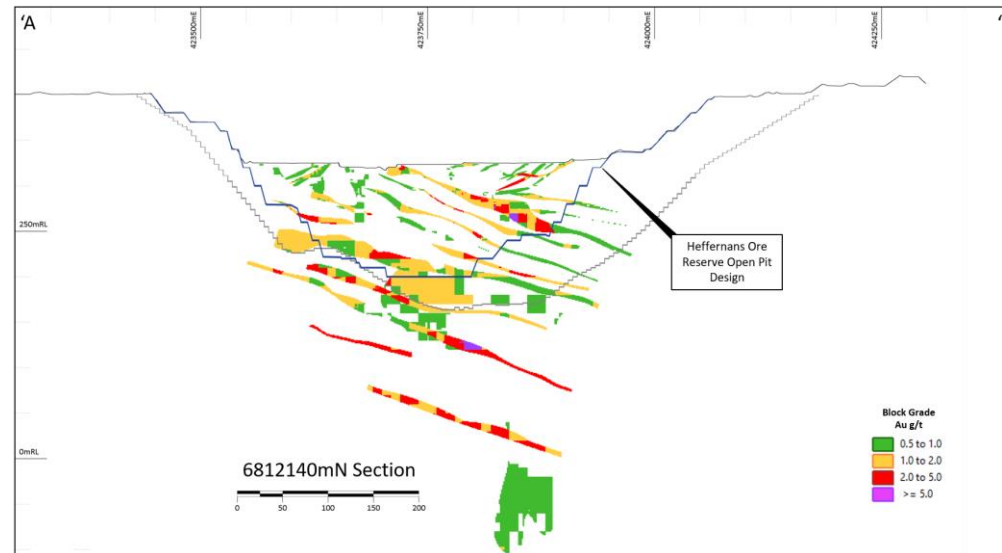

Heffernans Deposit Underpinning FY2021 Production

Heffernans pre-stripping complete; ore production profile increased

- Mining currently in the Heffernans Stage 2 and 3 sub-pit
- Pre-stripping complete, ore profile has increased as mining within wider syenite-hosted lodes set to dominate open pit production in FY2021
- Production outlook based on Ore Reserves of 3.5Mt @ 1.3 g/t for 147,000oz (using A\$1,750 gold price)

Heffernans cross-section

Heffernans cross-section showing:

- the Jupiter Mineral Resource block model (coloured by block grade)
- the outline of the existing pit (black line)
- an outline of the Ore Reserve open pit design (blue line)
- the A\$2,400/oz gold optimised pit shell applied for reporting (grey line)
- material greater than 2.0 g/t is reported below the A\$2,400/oz optimised pit shell

Production Transitioning to Doublejay by end FY2021

Doublejay to provide strong cash flow generation over FY22-23 following pre-strip campaign

- Stripping of Doublejay Stage 1 now commenced; Stage 2 underpins forecast production over FY2022 and FY2023
- Doublejay deposit consists of a series of shallow east dipping stacked lodes, with minor west dipping lodes within syenite stock, similar to Heffernans
- Confidence in mineralised domains improved following surface grade control drilling
- Production outlook based on Ore Reserves of 6.2Mt @ 1.2 g/t for 243,000oz (using A\$1,750 gold price)

Doublejay cross-section

Doublejay cross-section showing:

- *the Jupiter Mineral Resource block model (coloured by block grade)*
- *the outline of the existing pit (black line)*

Multi Level Exploration Program to Expand Resource Base

Targeting large potential base load ore feed and satellite deposits to bolster annual production

- 1** Identify and test potentially large, replacement base load ore feed sources
 - Cameron Well syenite target
 - Mt Marven shear zone prospect
- 2** Continue to develop satellite open pit targets to bolster annual production
 - Mt Marven extensional drilling
 - Mt McKenzie target
 - McKenzie Well target
 - Ganymede resource upgrade program
- 3** Advance underground opportunities to support evaluation of supplementary production from underground
 - Phoenix Ridge infill drilling
 - Transvaal and Craic resource upgrade program

Plan view of advanced exploration targets

Base Load Open Pit Opportunities

Potential avenues to extend production profile

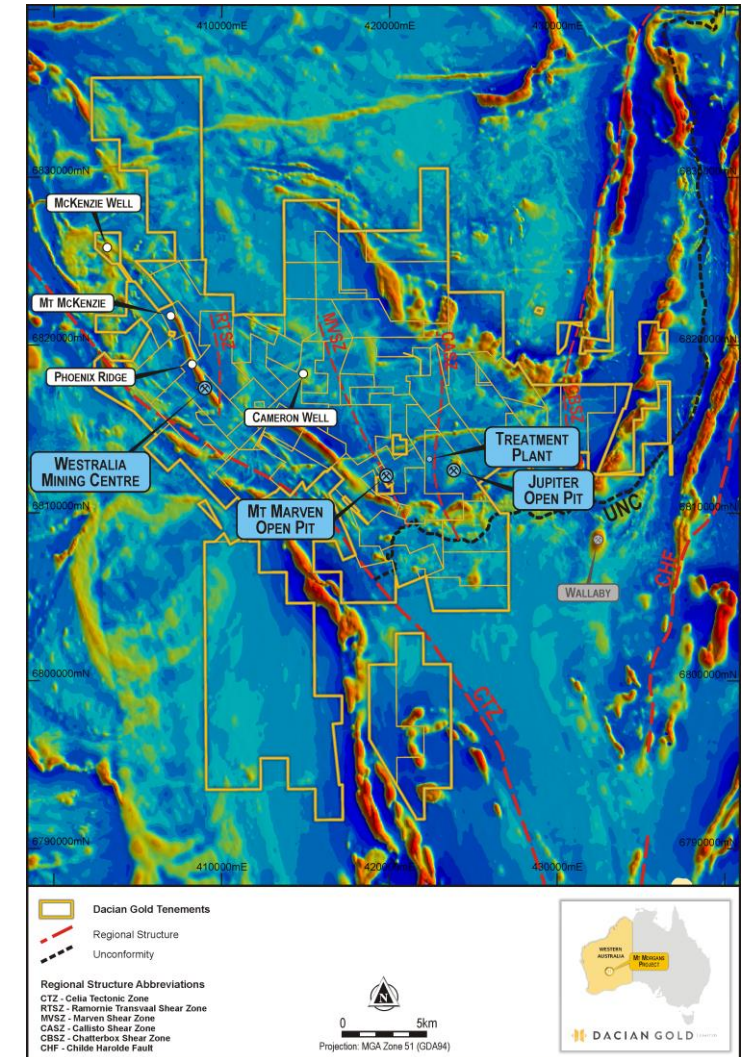

Cameron Well

- Syenite stock equivalent in scale to Jupiter and adjacent to the Mt Marven Shear Zone
- Multiple anomalous trends identified through RAB and RC drilling (2017- 2018) remain untested or open below transported cover
- Renewed approach aims to understand the broader structural framework with diamond drilling program currently underway
- Current Mineral Resource of 2.8Mt @ 1.1 g/t for 105,000oz

Mt Marven Shear Zone

- 20km of strike length interpreted from geophysics
- Shear hosted gold mineralisation associated with alteration and structural interaction
- Large portion of the interpreted northern extent is under cover with limited exploration
- Number of interpreted structural, geochemical and magnetic anomalies identified adjacent to the shear

Regional magnetics and exploration targets

Satellite Open Pit Opportunities

Potential supplement to base load production

Mt Marven

- Mineral Resource of 0.5Mt @ 1.8 g/t for 29,000oz*
- Recent drilling encountered key intercepts of:
 - 3m @ 21.79 g/t Au from 27m in 20MVRC0019
 - 3m @ 6.42 g/t Au from 1m in 20MVRC0039
 - 12m @ 1.41 g/t Au from 23m in 20MVRC0014
- Extends mineralisation ~800m beyond open pit limits
- Open along strike and at depth

Mt McKenzie

- Maiden diamond drill program commenced across the BIF hosted deposit
- Approximately 80m x 80m program along 500m of strike

McKenzie Well

- Phase 1 RC and diamond drilling program completed
- Phase 2 planned for FY2021

Ganymede

- Resource definition drilling planned for FY2021

Plan of the Mt Marven Deposit

Underground Opportunities

A component of a reoptimised underground operating strategy

Phoenix Ridge

- Inferred Mineral Resource of 0.5Mt @ 8.1 g/t for 125,000oz
- Infill drilling completed to support a Mineral Resource update

Westralia

- Results of infill drilling to be incorporated into the scoping study evaluation

Transvaal

- Underground Ore Reserve 0.5Mt @ 3.9 g/t for 65,000oz
- Evaluating both open pit and underground mining opportunities

Craic

- Preliminary underground block model developed
- Assessing mining potential and infill drilling requirements

Phoenix Ridge long section

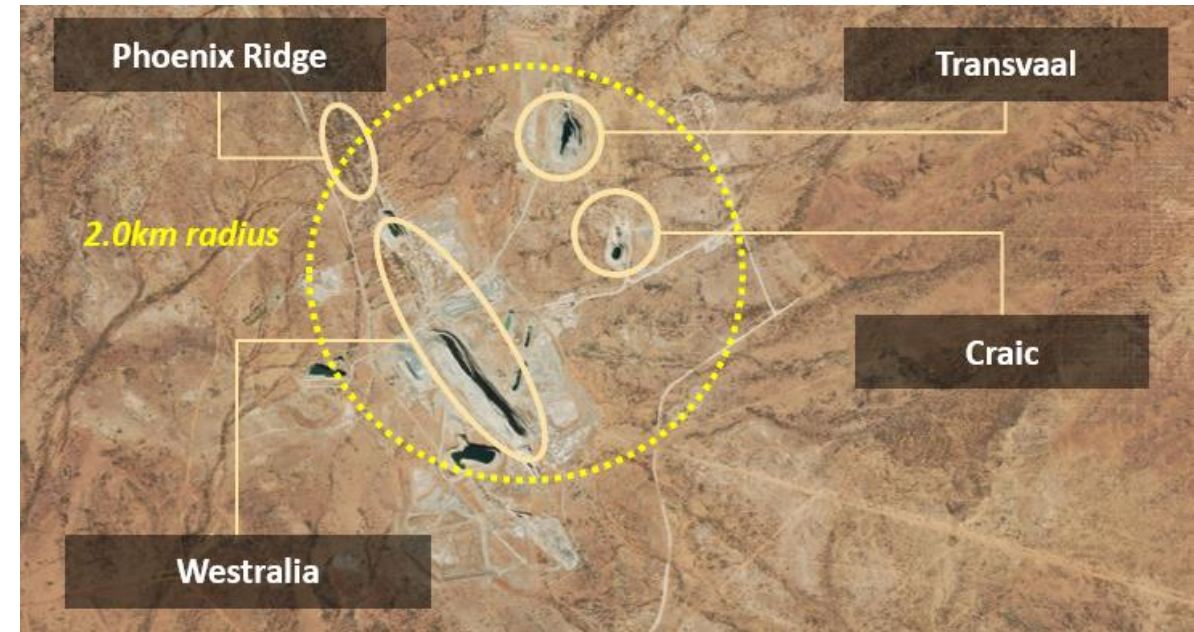

Phoenix Ridge long section showing diamond and RC drilling intercepts

Development of an Underground Strategy

Underground Mineral Resources outside of the current mine plan

- Scoping study commissioned to evaluate the potential for supplementary production from underground with results due early 2021
- Westralia, Phoenix Ridge, Transvaal and Craic within a 2.0km radius
- Total underground Mineral Resources of over 1.0Moz (7.1Mt @ 4.9 g/t) and Ore Reserves of 260,000oz (2.0Mt @ 4.0 g/t)
- Infrastructure established at Westralia and existing declines at Transvaal and Craic
- All potential underground ore sources are outside the current mine plan

Underground opportunities

Mineral Resources for all underground deposits

Mineral Resource	Cut-off grade	Measured			Indicated			Inferred			Total

Investment Highlights

Sustainable operating profile with multiple levers to unlock value

Operating plan focused on investment during FY2021 and harvesting through FY2022-2023

- *Sustainable open pit production profile averaging 110,000ozpa @ AISC of \$1,425/oz (FY2021-2023)*
- *Provides a robust platform to pursue growth*

Targeted exploration program underway across the Mt Morgans land package

- *Cameron Well diamond drill program commenced to evaluate potential larger scale concept*
- *Expansion drilling at Mt Marven yielding results*
- *Drilling completed at McKenzie Well and Mt McKenzie, to be assessed for satellite open pit potential*

Underground strategy for Mt Morgans to evaluate Westralia, Phoenix Ridge, Transvaal and Craic

- *Underground opportunities being considered for supplementary production from the Mineral Resource base of over 1.0Moz*

Increasing exposure to spot gold prices as hedge commitments and debt position reduce during FY2021

- *Hedges reduced to 61,488oz and restructured across FY2021 and FY2022, increasing near-term cash flow*
- *Total cash and equivalents of \$38.5 million with total debt of \$39.1 million at 30 September 2020*

Infrastructure in place to establish a regional processing hub

- *Attractive location for future consolidation in the region*

Major Shareholders

Board of Directors

Edward Van Heemst

Non-executive Chairman

- Prominent Perth businessman with 40 years' experience in management. Extensive knowledge of the capital markets and has well-established mining industry networks. Currently the Managing Director of Vanguard Press, a non-executive Director of Redstone Resources Ltd, and a past Chairman of Perth Racing.

Andrew Muir

Managing Director

- Over 27 years' experience in mining and finance. This includes 12 years as a geologist in many remote parts of Western Australia in a variety of roles in both exploration and mining. During his 5 years at Granny Smith, Mr Muir was instrumental in the discovery of the multi-million ounce Wallaby deposit. He also has 13 years experience in financial markets, working as a Resources Equity Analyst for firms such as JP Morgan and Hartleys, and in the Corporate Finance team at Argonaut. Mr Muir was appointed Managing Director of NTM in January 2018.

Eduard Eshuys

Non-executive Director

- A veteran Australian gold geologist with several decades of exploration and discovery, development and production experience. Success as exploration director at several listed companies included leadership of the teams that discovered the Plutonic Bronzewing and Jundee gold deposits in Western Australia. He also led the discovery of the Cawse Nickel Deposit and was involved in the Maggie Hays and Mariners nickel discoveries earlier in his career. More recently he was Managing Director and CEO of St Barbara Limited from 2004 to 2009 and led the re-establishment of Sons of Gwalia as a major underground gold producer. Currently Executive Chairman of DGO Gold Limited, an ASX listed gold explorer and investor and non-executive Director of Degrey Mining Limited.

Michael Ruane

Non-executive Director

- Dr Ruane has over 40 years' experience as a Technical Consultant in the chemical and metallurgical fields with a great depth of knowledge and corporate experience. Currently an Executive Director of Reward Minerals Ltd and the non-executive chairman of Empire Resources Limited

Project Overview

Redcliffe Gold Project (100% NTM):

- +720km² of highly prospective ground
- 679koz¹ resource with substantial upside & large areas untested
- Exploration Target of 1.4Moz to 2.2Moz² (including existing Resource)
- Maiden Hub Resource of 141koz @ 4.9g/t¹
- High grade oxide mineralisation close to surface at Hub & GTS

Aggressive Exploration:

- Well funded for ongoing drilling
- Large scale aircore testing priority targets, RC & diamond at existing deposits, Wells Group and other targets

Strategic Value:

- Strategic landholding in the region
- Potential to unlock value via access to processing facilities

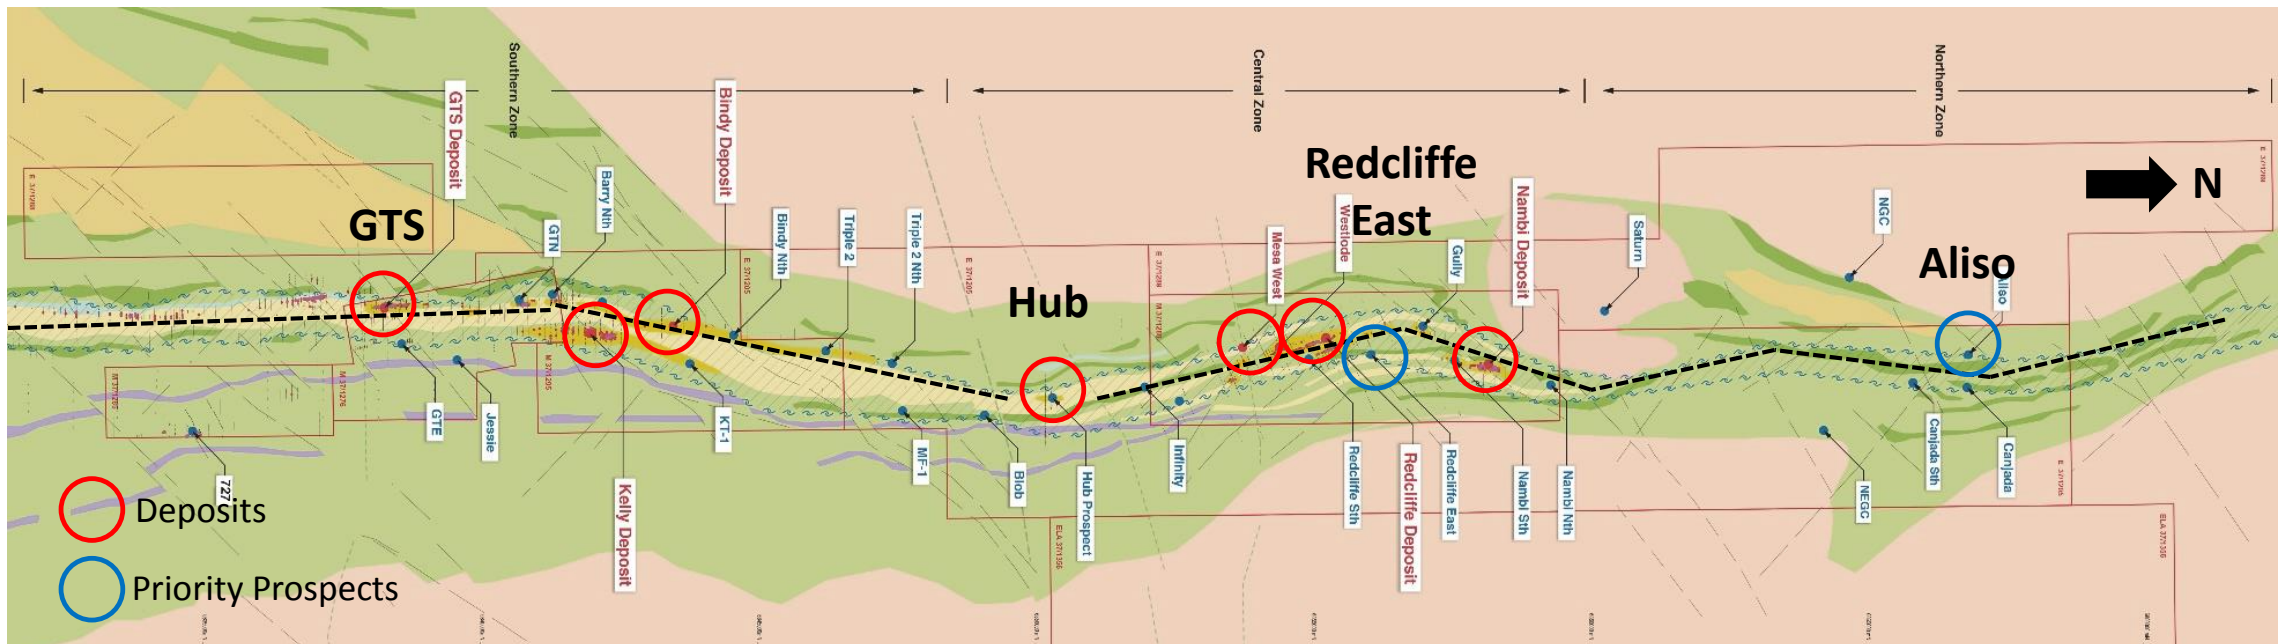

1. Refer to Slide 13 for the Mineral Resources.

2. Refer NTM Gold ASX Announcement dated 4 June 2019 for detail on the Exploration Target.

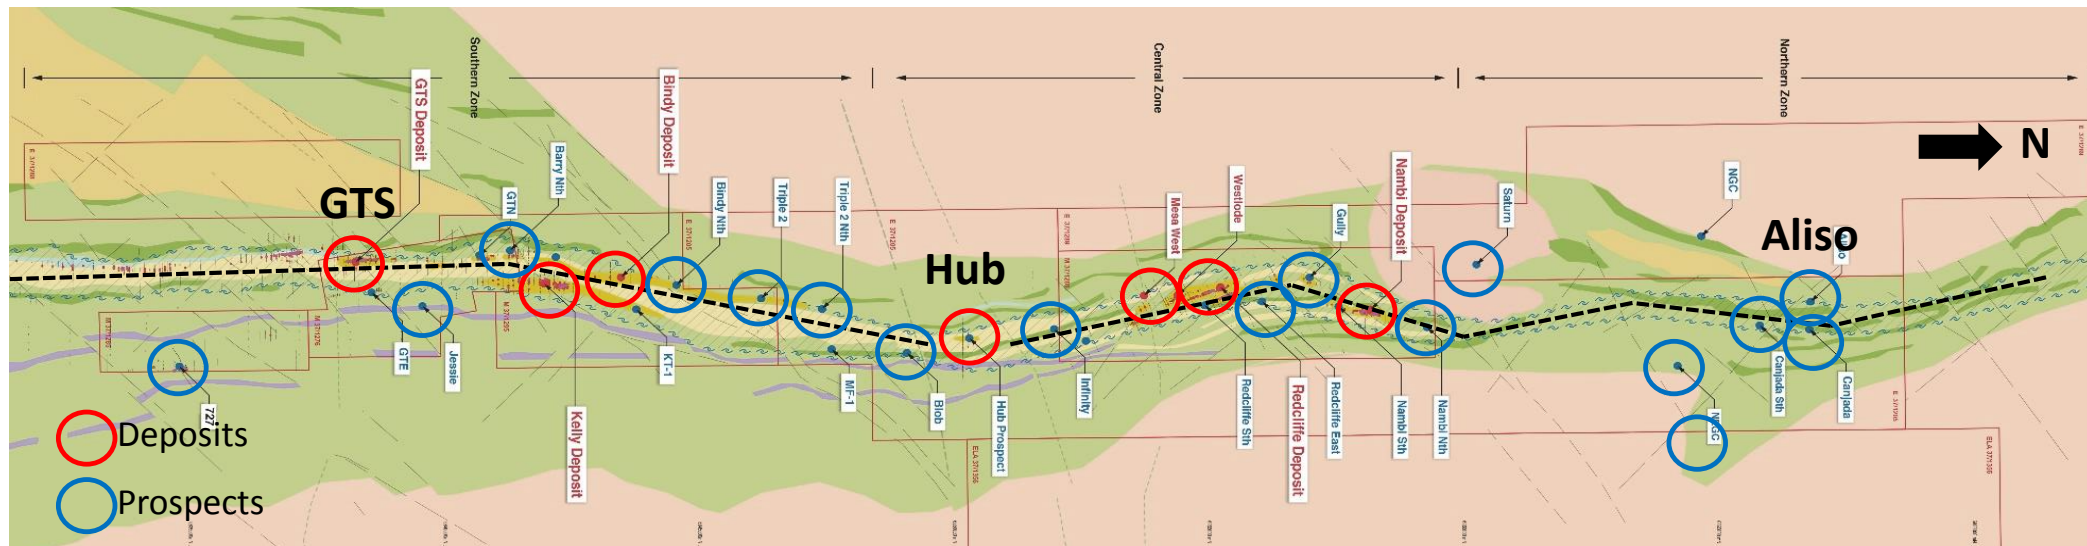

Mertondale Shear

- NTM owns 100% of the Redcliffe Gold Project - centred on the highly prospective Mertondale Shear Zone
 - Mertondale Shear Zone (MSZ) is a major gold-rich fluid pathway
 - Multiple deposits discovered to date
- Almost 40km strike within the Redcliffe Project, containing key prospects Hub, GTS, Redcliffe East and Aliso
- Mineralisation is associated with kinks, bends, offsets and intrusives, often along geological contacts
- Mineralisation occurs from the far north (Aliso) to the southern extensions (GTS)

Current Exploration

- Mineralisation along entire strike of Redcliffe tenements
- Aircore Completed:
 - Following up historic hits, structures and conceptual targets
- Diamond & RC drilling underway:
 - Extensions to Hub & GTS deposits
 - Gully area
- **All deposits still open**

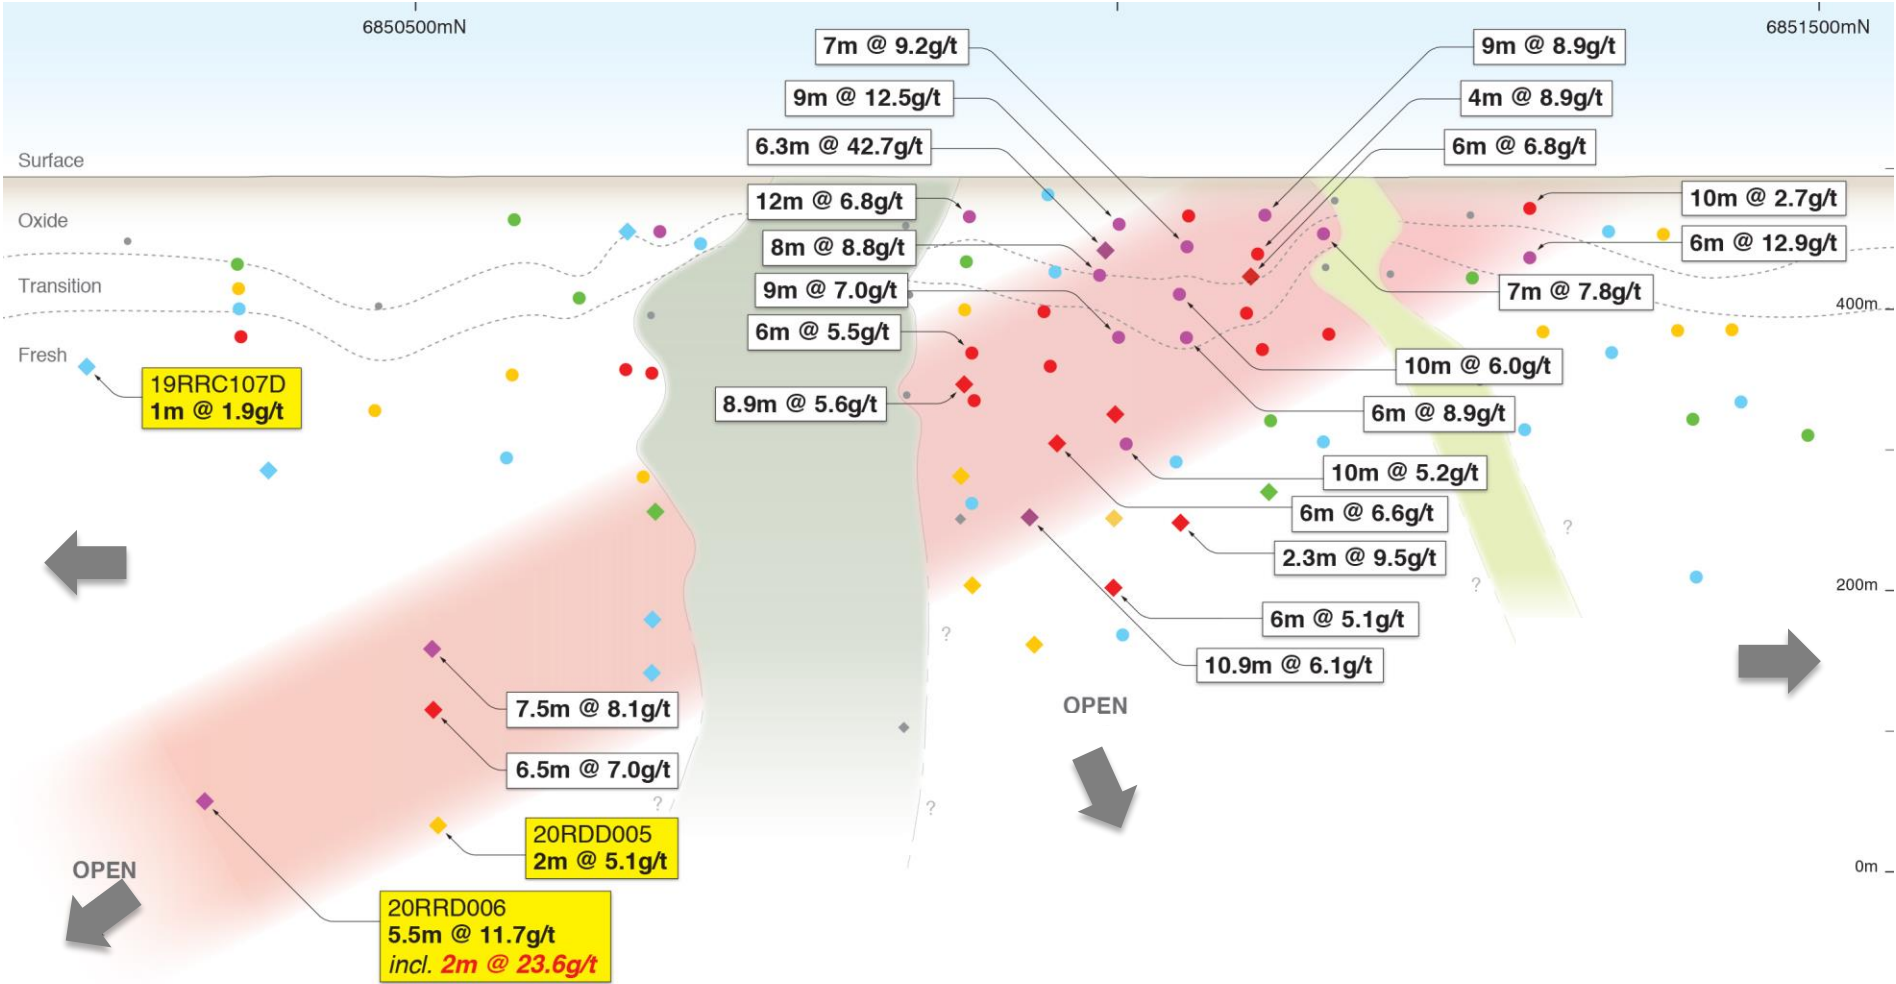

Hub: High Grade Growth Prospect

- Discovered October 2018 via aircore drilling
- High grade oxide close to surface
- Maiden Mineral Resource Estimate:
 - 890.3kt @ 4.9 g/t Au for 141koz Au¹
- Oxide component is 43koz @ 6.6g/t to 80m depth
- Open at depth and along strike

1: Refer to Slide 13 for the Mineral Resources.

Outstanding Region

- Gold rich area, highly prospective
- Significant infrastructure
- Trucking distance to Mt Morgans operations

679koz¹ Resource with Substantial Upside

- High grade oxide mineralisation close to surface at Hub & GTS
- All deposits open

Active Exploration

- Aggressive ongoing drilling
- Testing multiple new targets and extensions
- Numerous opportunities for Resource expansion
