

DACIAN
GOLD ASX CODE: DCN

Building Australia's next significant mid-tier gold producer

- *Measured and Indicated Resources of 2.2Moz; maiden Ore Reserves imminent*
- *Feasibility Study on +220kozpa project set for Q4 2016; First production early 2018*
- *Outstanding exploration upside and growth potential*

August 2016

Rohan Williams – Executive Chairman

Disclaimer

- The purpose of this presentation is to provide general information about Dacian Gold Limited (“Dacian” or the “Company”). It is not recommended that any person makes any investment decision in relation to the Company based solely on this presentation.
- This presentation does not necessarily contain all information which may be material to the making of a decision in relation to the Company. Any investor should make their own independent assessment and determination as to the Company’s prospects prior to making any investment decision, and should not rely on the information in this presentation for that purpose.
- This information in this presentation is confidential, is being furnished to you solely for your information and may not be reproduced, in whole or in part, or distributed to any other person except to your legal, tax and financial advisers who agree to maintain the information in this presentation in confidence.
- This presentation does not involve or imply a recommendation or a statement of opinion in respect of whether to buy, sell or hold securities in the Company. The securities issued by the Company are considered speculative and there is no guarantee that they will make a return on the capital invested, that dividends will be paid on the shares or that there will be an increase in the value of the shares in the future.
- This presentation contains certain statements which may constitute “forward-looking statements”. Such statements are only predictions and are subject to inherent risks and uncertainties which could cause actual values, results, performance or achievements to differ materially from those expressed, implied or projected in any forward-looking statements. No representation or warranty, express or implied, is made by the Company that the matters stated in this presentation will be achieved or prove to be correct. Recipients of this presentation must make their own investigations and inquiries regarding all assumptions, risks, uncertainties and contingencies which may affect the future operations of the Company or the Company’s securities.
- The Company does not purport to give financial or investment advice. No account has been taken of the objectives, financial situation or needs of any recipient of this document. Recipients of this document should carefully consider whether the securities issued by the Company are an appropriate investment for them in light of their personal circumstances, including their financial and taxation position.
- This presentation is presented for informational purposes only. It is not intended to be, and is not, a prospectus, product disclosure statement, offering memorandum or private placement memorandum for the purpose of Chapter 6D of the Corporations Act 2001. Except for statutory liability which cannot be excluded, the Company, its officers, employees and advisers expressly disclaim any responsibility for the accuracy or completeness of the material contained in this presentation and exclude all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission there from. The Company accepts no responsibility to update any person regarding any inaccuracy, omission or change in information in this presentation or any other information made available to a person nor any obligation to furnish the person with any further information.

Competent Person Statements

- The information in this report that relates to Exploration Results is based on information compiled by Mr Rohan Williams who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Williams holds shares and options in, and is a director and full time employee of, Dacian Gold Ltd. Mr Williams has sufficient experience which is relevant to the style of mineralisation under consideration to qualify as a Competent Person as defined in the 2012 edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.” Mr Williams consents to the inclusion in the report of the matters based on the information compiled by him, in the form and context in which it appears.
- The information in this report that relates to the Westralia Mineral Resource (see ASX announcement – 28 July 2016), the Jupiter Mineral Resource (see ASX announcement – 19 July 2016), the Transvaal Mineral Resource (see ASX announcement – 16 September 2015), and the Ramornie Mineral Resource (see ASX announcement – 24th February, 2015) is based on information compiled by Mr Shaun Searle who is a Member of Australian Institute of Geoscientists and a full time employee of RPM. Mr Searle has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Searle consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
- The information in this report that relates to the Jupiter Low Grade Stockpile (see ASX announcement – 16th September, 2015) and is based on information compiled by Mr Rohan Williams who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Williams holds shares and options in, and is a director and full time employee of, Dacian Gold Ltd. Mr Williams has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Williams consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
- The information in this report that relates to Mineral Resources (other than Westralia, Jupiter, Transvaal Jupiter Low Grade Stockpile and Ramornie which are reported under JORC 2012) is based on information compiled by Mr Rohan Williams, who is a Member of The Australasian Institute of Mining and Metallurgy. Mr Williams holds shares and options in, and is a director and full time employee of, Dacian Gold Ltd.
- Where the Company refers to the Mineral Resources in this report (referencing the releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the resource estimate with that announcement continue to apply and have not materially changed.
- The information in this report that relates to Ore Reserves is based on information compiled by Mr Bill Frazer, a director and full time employee of Mining One Pty Ltd and a Member of The Australasian Institute of Mining and Metallurgy. Mr. Williams and Mr Frazer have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Williams and Mr Frazer consent to the inclusion in the report of the matters based on their information in the form and context in which it appears.
- All information relating to Mineral Resources and Ore Reserves (other than the King Street and Craic) were prepared and disclosed under the JORC Code 2012. The JORC Code 2004 Mineral Resource and Ore Reserves have not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last updated.

Cautionary Statement

- Dacian Gold has concluded it has a reasonable basis for providing the forward looking statements that relate to the Mt Morgans Scoping Study that are included in this presentation. The detailed reasons for that conclusion are outlined in ASX announcement dated 30 September 2015, which has been prepared in accordance with the JORC Code (2012) and the ASX Listing Rules. The Company advises that the Scoping Study results, Production Targets and Forecast Financial Information contained in this announcement are preliminary in nature as the conclusions are based on low-level technical and economic assessments, and are insufficient to support the estimation of Ore Reserves or to provide an assurance of economic development at this stage. There is a low level of geological confidence associated with Inferred Mineral Resources used in this report and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the Production Target itself will be realised. The stated Production Target is based on the Company’s current expectations of future results or events and should not be relied upon by investors when making investment decisions. Further evaluation work and appropriate studies are required to establish sufficient confidence that this target will be met.
- The Company confirms that all material assumptions underpinning the production target and forecast financial information contained in the Company’s ASX announcement released on 30 September 2015 continue to apply and have not materially changed.

A Transformational 12 months – Key Achievements Since Diggers 2015

Mount Morgans Gold Project

- ✓ Positive Scoping Study – 220,000ozpa at AISC of A\$929/oz
- ✓ Commenced Feasibility Study
- ✓ Completed 90,000m in-fill and extensional drill program
- ✓ Increased global resource inventory to 3.3Moz
- ✓ 73% increase in Measured and Indicated Resources to 2.2Moz
- ✓ Commenced regional exploration
- ✓ New discoveries at Jupiter, Westralia and Morgans North

Corporate

- ✓ Increased market capitalisation from \$42M to ~\$480M
- ✓ Raised \$25M at 69cps – fully funded to decision to mine
- ✓ Investment by leading Australian institutions – 38% of share register
- ✓ Included in ASX All Ordinaries Index – 2nd best performing stock in All Ords in FY 2016
- ✓ Strengthened board and management with key appointments

Corporate Overview – Australia's Next Mid-Tier Gold Producer

Capital Structure

133.3 million	Shares on Issue
13.2 million	Options (unlisted, average exercise price 84c)
~A\$480 million	Market Cap (A\$3.64)
~A\$9.6 million	Cash (as at 30 June 2016)
10	Number of brokers formally covering Dacian

Recent Share Price Performance – ASX Code: DCN

Major shareholders

Top 10 hold 45%

Directors – 10%

Institutions – 38%

- Australia 24%
- North America 11%
- UK 3%

Board of Directors

Rohan Williams	Executive Chairman (Avoca / Alacer Gold, WMC)
Barry Patterson	Non-Executive Director (Sonic, Silex, GR Engineering, Eltin)
Rob Reynolds	Non-Executive Director (Avoca / Alacer Gold, Delta Gold)
Ian Cochrane	Non-Executive Director (Cochrane Lishman, Ausdrill)

Mount Morgans – Unlocking the Value of a 3.3Moz Resource

Australia's next significant high-grade mid-tier gold project

- 520km² tenement holding (100%-owned) in the +25Moz Laverton goldfield:
 - *Australia's second largest gold district after Kalgoorlie*
 - *Produced +1.3Moz at 4.1g/t Au from mainly open pit operations since the 1990s*
- High-quality resource inventory – 3.3Moz (44.7Mt at 2.3gpt):
 - *2.2Moz, or 67%, now classified as Measured and Indicated*
- Maiden Ore Reserves imminent
- Feasibility Study set for completion in Q4 2016:
 - *Targeting 220,000ozpa at AISC A\$929/oz (US\$650/oz)**
 - *Estimated capital cost including 2.5Mtpa plant: A\$157M*
- Construction planned for early 2017
- First production targeting Q1 CY 2018
- Fully-funded to end of Feasibility Study and Project Finance

*Refer to ASX release – 30 September 2015

Mount Morgans – A Clear Pathway to Gold Production

Conventional WA open pit and underground mine development

- Granted Mining Leases in a well-established mining district with world-class infrastructure
- Surrounded by world-class mines including Granny Smith (+2Moz), Sunrise Dam (+10Moz), Wallaby (+8Moz)
- Targeting development of two large high-grade underground mines at Westralia and large open pit mining complex at Jupiter, feeding 2.5Mtpa CIP plant
- September 2015 Scoping Study* confirmed the potential to develop a significant new high margin Australian gold project with key outcomes including:
 - *220,000ozpa production for first 5 years (3.1 g/t Au)*
 - *Low costs: life-of-mine AISC of A\$929/oz (US\$650/oz)*
 - *Initial 7-year LOM producing 1.2Moz*
 - *Infrastructure capital A\$157M including 2.5Mtpa plant*
 - *Extensive infrastructure already in place*

*Refer to ASX release – 30 September 2015

Typical Westralia mineralisation: classic sulphide + gold replacement of magnetite bands in BIF

Westralia Prospect – A new chapter for a prolific goldfield

- Targeting two large, high-grade underground gold mines

Westralia – A Significant New Chapter for a Prolific Goldfield

New exploration thinking and technology has unlocked a significant high-grade gold project

- Oldest gold discovery in Laverton field
- Historically the dominant producer at Mount Morgans:
 - *Produced +900,000oz @ 4.5 g/t Au from historical u/g and open pit up until 1998*
- Well-understood metallurgy – historical recoveries averaged 91-93% using CIP processing
- Resource has grown more than four times since Dacian's 2012 acquisition:
 - *from 0.4Moz @ 3.4 g/t to 1.6Moz @ 5.8 g/t Au**
- Significant potential for further growth

**Refer to Appendix for resource classifications*

Westralia – A Huge System....and Growing

Initial success in identifying new resources below the historical open pit

- Appeared from the outset to be significantly under-explored
 - *12m @ 9 g/t Au was deepest intersection*
 - *“Flattening Zone” thought to be orebody-terminating fault*
- Initial resource – 3.3Mt @ 3.4 g/t for 0.36Moz
- New approach, new techniques used to unlock exploration potential:
 - *91,000m of drilling of which 85% is diamond drilling (153 holes)*
 - *DHTEM*
 - *Ultra-detailed core logging*

Westralia – A Huge System....and Growing

Westralia is a much bigger system then previously understood

- July 2016 Mineral Resource
8.6Mt @ 5.8 g/t for 1.6Moz
- Continuously mineralised for ~3km
- 46,000m diamond drilling program complete - recent results from **Allanson Underground** drilling* include:
 - 3.6m @ 48.0g/t Au
 - 3.0m @ 24.6g/t Au
 - 5.6m @ 23.2g/t Au
 - 4.3m @ 22.4 g/t Au
 - 6.2m @ 20.1g/t Au
 - 4.3m @ 17.5 g/t Au
 - 2.9m @ 16.1g/t Au
 - 4.0m @ 13.9 g/t Au
 - 4.5m @ 13.4g/t Au

**Refer to ASX releases 11/02/2016, 21/03/2016 and 01/06/2016*

Westralia – A Huge System....and Growing

Westralia is a much bigger system then previously understood

- July 2016 Mineral Resource
8.6Mt @ 5.8 g/t for 1.6Moz
- Continuously mineralised for ~3km
- 46,000m diamond drilling program complete - recent results from **Beresford Underground** drilling* include:
 - 3.3m @ 84.3 g/t Au
 - 13.2m @ 14.1 g/t Au
 - 4.8m @ 26.3 g/t Au
 - 3.7m @ 18.0 g/t Au
 - 6.4m @ 12.1g/t Au
 - 2.0m @ 15.9 g/t Au
 - 1.7m @ 10.2 g/t Au
 - 2.5m @ 9.7 g/t Au
 - 3.2m @ 8.9 g/t Au

**Refer to ASX release 28/06/2016*

Westralia – A Huge System...Now with a Significant M&I Inventory

Westralia is a much bigger system then previously understood

- July 2016 Mineral Resource
8.6Mt @ 5.8 g/t for 1.6Moz*
- 176% increase in Measured and Indicated Resource to 905,000oz
- 15% increase in average resource grade to 5.8g/t Au
- Inferred resource of 715,000oz at 6.5g/t Au – excellent resource upgrade opportunity
- 1.2Moz resource block immediately below the RL base of the historical open pit:
 - *3,000oz per vertical metre (ovm) endowment*

**Refer to ASX release – 28 July 2016*

Westralia – Recent Discoveries a Potential Game-Changer

Westralia is a much bigger system than originally thought...as evidenced by recent new discoveries / interpretations

- New interpretation of high grade shoot control at Westralia suggests vast tracks of the Westralia BIF remain undrilled
- Includes newly discovered high grade mineralisation, near surface, directly above Allanson Underground
- Recent confirmation of a previously unrecognized, mineralised Footwall BIF unit above Beresford Underground

**Refer to ASX release – 25 July 2016*

Westralia – Conceptual Underground Mine Designs

Conceptual underground mines proposed at Beresford, Allanson and Transvaal (September 2015)

**Refer to ASX release – 30 September 2015*

DACIAN
GOLD ASX CODE: DCN

11.40 g/t

0.26 g/t

Unusual syenite-hosted mineralisation style – similar to +8Moz Wallaby deposit

Jupiter Prospect – The other half of Mount Morgans

- Targeting an extensive new open pit mining complex

Jupiter Prospect – Potential Open Pit Mining Complex

Targeting an extensive new open pit mining complex

- Mined from 1994-1996 producing ~150,000oz from one open pit
- Dacian's drilling discovered mineralisation extends for >1.8km to the south of the existing pit
- Resource grew from 73Koz to 1,400Koz from >68,000m of drilling:
- ***New resource of 1.4Moz at 1.3g/t Au****
- Conceptual mining proposal based on expansion of existing pit and new standalone pits

**Refer to the Appendix for resource classifications*

Jupiter Prospect – Success Immediately Beneath Pit Floor

Targeting an extensive new open pit mining complex / single large open pit

- +68,000m of drilling completed since 2013 – 481 RC and diamond holes
- Significant intersections from recent in-fill drilling include:
 - 133m @ 2.4 g/t Au
 - 139.3m @ 1.3 g/t Au
 - 87m @ 1.7 g/t Au
 - 139m @ 1.2 g/t Au
 - 50m @ 1.5 g/t Au
 - 79.4m @ 1.3 g/t Au
 - 186.7m @ 1.0 g/t Au

**Refer to ASX releases – 8 February 2016, 14 March 2016, 9 May 2016 and 16 June 2016*

Jupiter Prospect – July 2016 Resource Upgrade

Targeting an extensive open pit mining complex

- 69% increase in Measured and Indicated Resources from 663,000oz to **1.12Moz** – 83% of total
- Total Jupiter Prospect Mineral Resource up by 19% to:
 - **33.7Mt at 1.3g/t Au for 1.4Moz**
- 816,000oz lies within 150m of surface = +5000oz per vertical metre, accessible during early stages of mining
- Updated 2016 Resource based on:
 - 11.6Mt @ 1.2 g/t Au for 463,000oz at Doublejay;
 - 15.9Mt @ 1.4 g/t Au for 719,000oz at Heffernans;
 - 2.7Mt @ 1.3 g/t Au for 109,000oz at Ganymede; and
 - 3.5Mt @ 0.5 g/t Au for 58,000oz in low-grade surface stockpiles
- Open pit mine designs underway

**Refer to ASX release – 19 July 2016*

DACIAN
GOLD ASX CODE: DCN

Mount Morgans Exploration – “Cracking the code”

- Outstanding discovery potential with controls on mineralisation now well understood

Exploration – Cracking the Code at Mount Morgans

Exploration set to drive next phase of resource growth at Mount Morgans

- Mount Morgans exploration potential overlooked for several decades:
 - *Historical focus on production rather than exploration; multiple owners; disjointed exploration approach*
- Extensive use of oriented diamond drilling plus very detailed logging led to better understanding of the orebody host sequences and structural controls of the high-grade shoots contained within
- Examples include:
 - *Recent discovery of Footwall BIF mineralisation at Westralia (i.e. Allanson) in an area largely overlooked despite +100 years of mining and exploration*
 - *At Jupiter, the parallelism of north-south striking, flat east-dipping gold structures, such as the CSZ*

Jupiter – Outstanding Near-Mine Exploration Potential

Numerous priority drill targets, significant unexplained anomalies, excellent prospectivity

- Ultra-detailed magnetic survey suggests potential for new “syenite corridors”*
- Significant and unexplained magnetic anomalies at Europa and Rosetta represent priority targets
- Excellent prospectivity to grow 1.4Moz resource base
- +600-hole reconnaissance drilling program underway

**Refer to ASX release – 4 November 2015*

Regional Exploration and Growth – Callisto

A significant new greenfields discovery opportunity

- Classic “doughnut” magnetic anomaly, similar to nearby 8Moz Wallaby deposit
- Only three previous drill holes – did not explain magnetic anomaly
- Anomaly modelled as starting at 250m below surface (underground target)
- Two 800m deep oriented diamond holes to test target have commenced

Lake Carey – Not the Easiest Work Environment

But what lies beneath??

Regional Exploration and Growth – Cameron Well

Another significant regional discovery opportunity

- Another “doughnut” magnetic anomaly
- Reconnaissance RAB drilling on 100m grid
 - *Geochemical grid (aim to identify <0.5g/t Au anomalism)*
- Significant anomalism/mineralisation over 1.5km x 1km present:
 - *North Anomaly has:*
 - *20 holes intersecting 1g/t – 3g/t Au;*
 - *5 holes intersecting 3g/t – 5g/t Au and*
 - *5 holes intersecting 5g/t – 10g/t Au*
 - *South Anomaly has numerous intersections including high grade: 7m @ 15g/t Au and 8m @ 13g/t Au*
- Drilling planned 2H 2016

Regional Exploration and Growth – Cameron Well

Another significant regional discovery opportunity

- +90% of historical drilling RAB / AC and includes:
 - 7m @ 15 g/t Au; and
 - 8m @ 13 g/t Au
- Flat gold structures present as seen at Jupiter
- All results outside existing resource base
- Not followed up for 22 years!

Summary – Strong news-flow, multiple share price catalysts

Dacian's transformational year is continuing to gather momentum with two big quarters ahead...

September Quarter

- Jupiter Ore Reserve, optimisation studies and mine design
- Westralia Ore Reserve, optimisation studies and mine design
- Mount Morgans production scheduling
- Processing facility / site infrastructure designs
- Regulatory approvals / permitting submitted
- Exploration drilling including initial Callisto results

December Quarter

- Feasibility Study completed
- Project Finance completed
- Board to consider Decision to Mine

Commence construction Q1 CY2017, Commence gold production Q1 CY2018

Summary – Key Investment Takeaways

- On track to be Australia's next mid-tier gold producer by 2018
- 3.3Moz resource base with outstanding growth potential
- Targeting 220,000ozpa at AISC of A\$929/oz (US\$650/oz)
- Clear development pathway: Feasibility Study set for completion by end-2016
- Standard WA open pit and underground gold mine with “off-the-shelf” plant
- Experienced board and management with strong track record
- Tight capital structure – 45% held by top 10
- Poised for further significant growth in countdown to production

After 110 Years – Another Mt Morgans Team Determined to Succeed

1906 Premiers – Mt Morgans Football Team
